

#1

Title: 'Add to Cart' button does not respond for some products when signed in with problem_user

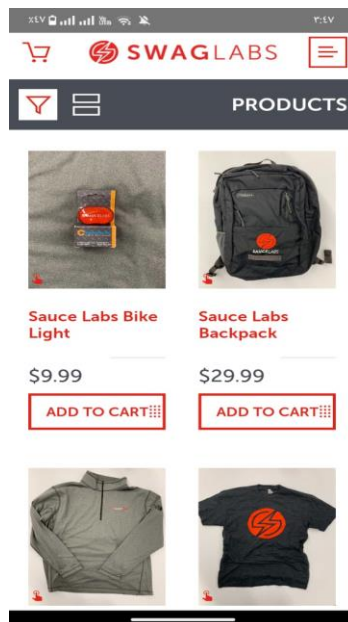

Steps:

- 1) Open the Swag Labs mobile app (com.swag labs mobile app)
- 2) Login with problem_user / secret_sauce
- 3) On the Products screen locate any product
- 4) Tap the 'Add to Cart' button
- 5) Observe the button label and cart badge

Description:

When logged in with problem_user and trying to add a product to the cart from the inventory screen, the 'Add to Cart' button did not change to 'Remove' for some products and the cart badge did not update. The issue is inconsistent across products.

Screenshot / Attachments:

Expected Result: The button should change to 'Remove' immediately and the cart badge should increment by 1.

Actual Result: For some products the button stays as 'Add to Cart' and the badge does not update. The item is not added to the cart.

Severity: High

Priority: High

#2

Title: Not all products can be added to the cart when signed in with problem_user

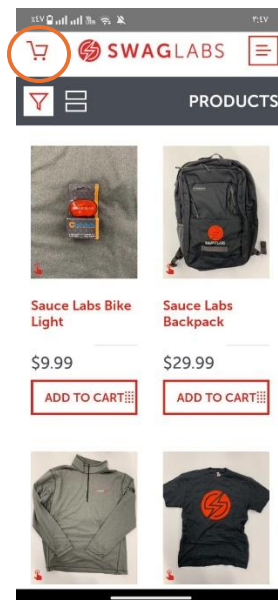

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with problem_user / secret_sauce
- 3) On the Products screen tap 'Add to Cart' on every product one by one
- 4) Observe the buttons and cart badge after each tap

Description:

When logged in with problem_user and trying to add all 6 products to the cart, some products fail to be added. The 'Add to Cart' button does not change to 'Remove' for those products and the badge count does not reflect the correct number.

Screenshot / Attachments:

Expected Result: All 6 'Add to Cart' buttons should change to 'Remove' and the badge should show 6.

Actual Result: Only some products get added. Others stay unchanged. Cart badge shows wrong count.

Severity: High

Priority: High

#3

Title: 'Add to Cart' button on the Product Details page does not work with problem_user

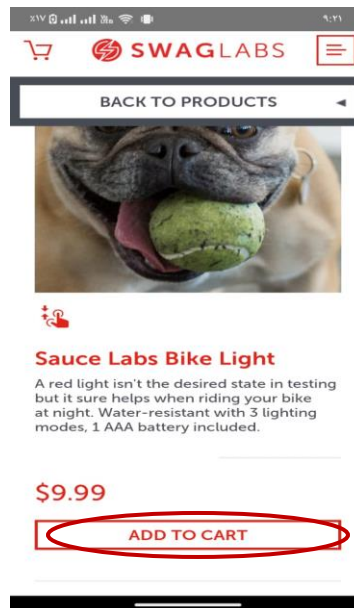

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with problem_user / secret_sauce
- 3) On the Products screen tap on any product name or image
- 4) On the product details page tap 'Add to Cart'
- 5) Observe the button label and cart badge

Description:

When logged in with problem_user and navigating to a product details page, tapping the 'Add to Cart' button does not work as expected. The button label does not change and the cart badge does not update.

Screenshot / Attachments:

Expected Result: Button should change to 'Remove' and cart badge should increment by 1.

Actual Result: Button stays as 'Add to Cart' and cart badge does not update. Product is not added to cart.

Severity: High

Priority: High

#4

Title: Product Details page displays a dog image instead of the correct product image with problem_user

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with problem_user / secret_sauce
- 3) On the Products screen tap on any product name or image
- 4) Observe the image displayed on the product details page
- 5) Compare the image with the product name and description

Description:

When logged in with problem_user and opening any product's details page, the product image is replaced by an unrelated image of a dog. The product name, price, and description are displayed normally but the image does not match the actual product.

Screenshot / Attachments:

Expected Result: The product details page should display the correct product image that matches the product name and description.

Actual Result: A dog image is displayed instead of the actual product image.

Severity: High

Priority: High

#5

Title: Product price changes after adding items to the cart with problem_user

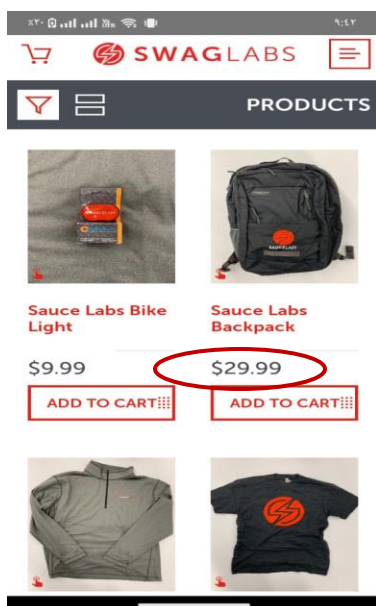

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with problem_user / secret_sauce
- 3) Note the listed price of any product on the Products screen
- 4) Tap 'Add to Cart' on that product
- 5) Navigate to the product details page and observe the price

Description:

When logged in with problem_user, the price of a product changes after it is added to the cart. The price displayed on the inventory screen or the details page is inconsistent and does not remain the same as when the product was first viewed.

Screenshot / Attachments:

Expected Result: Product prices should remain constant throughout the session regardless of cart actions.

Actual Result: The product price changes after tapping 'Add to Cart', showing a value different from the original listed price.

Severity: High

Priority: High

#6

Title: Item Total at checkout is calculated incorrectly with problem_user

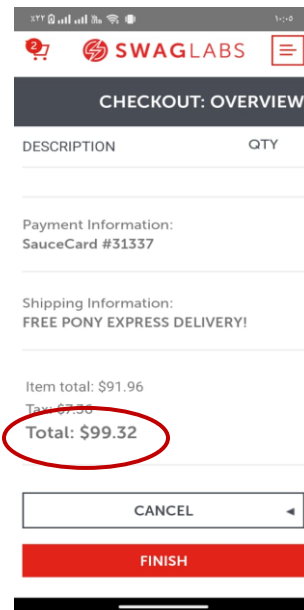

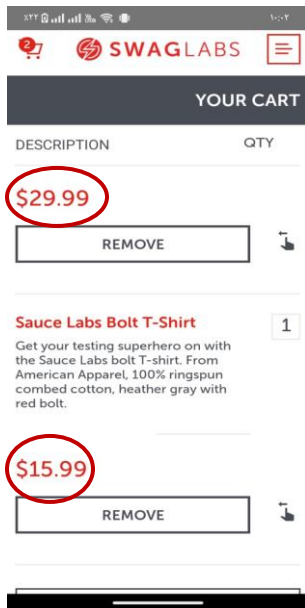

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with problem_user / secret_sauce
- 3) Add multiple products to the cart
- 4) Tap the cart icon and proceed to Checkout
- 5) Fill in the required shipping information and tap Continue
- 6) On the Order Overview screen check the 'Item Total' value
- 7) Manually sum the prices of all added items and compare

Description:

When logged in with problem_user and proceeding to checkout, the 'Item Total' displayed on the Order Overview screen does not match the correct sum of the added products. The expected total for the added items should be \$45.98 but a different value is shown.

Screenshot / Attachments:

Expected Result: Item Total should equal the correct sum of all products added to the cart. Expected value: \$45.98.

Actual Result: Item Total shows an incorrect amount that does not match the actual sum of the cart items.

Severity: Critical

Priority: Critical

#7

Title: Cart contents are lost after logging out and logging back in

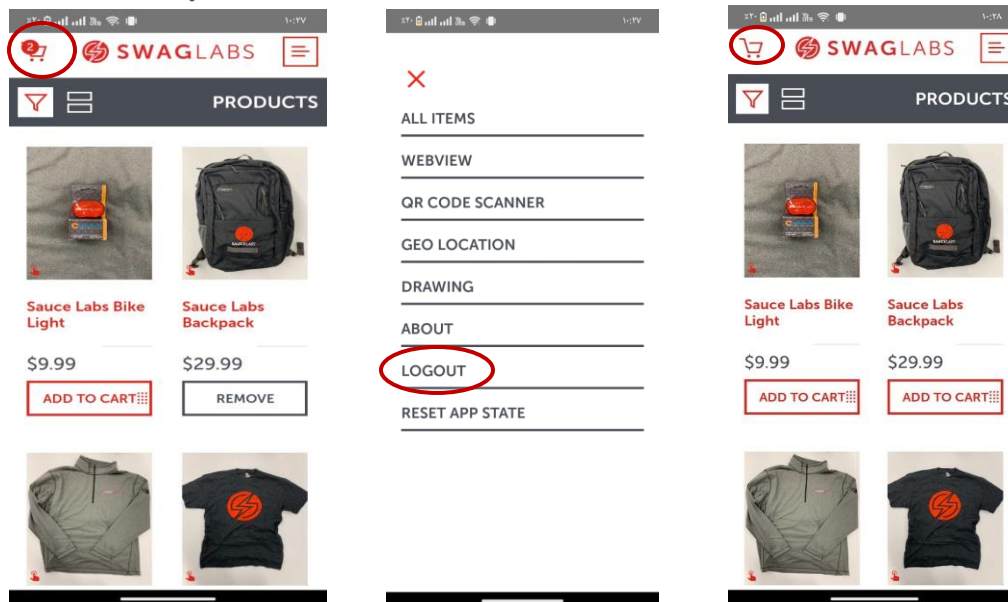

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with problem_user / secret_sauce
- 3) Add one or more products to the cart
- 4) Open the side menu and tap 'Logout'
- 5) Log back in with the same credentials
- 6) Tap the cart icon and observe its contents

Description:

When logged in with problem_user, adding items to the cart, logging out, and logging back in results in a completely empty cart. All previously added items are lost without any warning or confirmation message to the user.

Screenshot / Attachments:

Expected Result: Cart contents should either be preserved across sessions or the user should be clearly warned that the cart will be cleared upon logout.

Actual Result: The cart is completely empty after logging back in. All previously added items are gone with no warning shown to the user.

Severity: High

Priority: High

#8

Title: Cart is not cleared after successfully completing an order

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with problem_user / secret_sauce
- 3) Add one or more products to the cart
- 4) Proceed through all Checkout steps and tap 'Finish'
- 5) On the order confirmation screen tap 'Back Home'
- 6) Tap the cart icon and observe its contents

Description:

After completing an order and returning to the home screen, the cart still contains the items that were part of the completed order. The cart badge still shows a number and the items are still listed inside. The cart should be automatically emptied after a successful purchase.

Screenshot / Attachments:

Expected Result: After completing an order, the cart should be emptied automatically and the cart badge should reset to 0.

Actual Result: The cart retains all previously ordered items after order completion. The badge still shows a count and items are still visible in the cart.

Severity: High

Priority: Medium

#9

Title: Social media links in the footer do not open any page

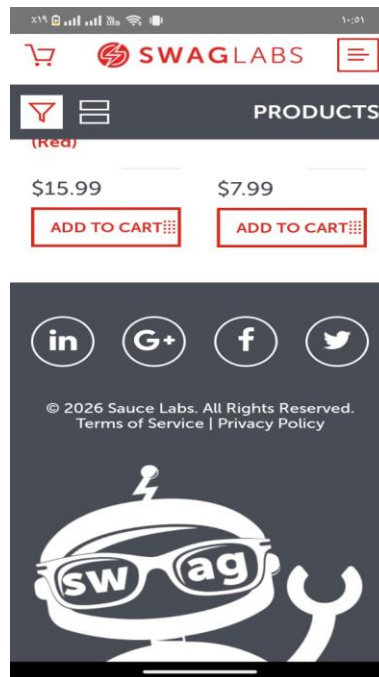

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with any valid credentials
- 3) Scroll to the bottom of the Products screen
- 4) Tap the Facebook icon
- 5) Return and tap the Twitter icon
- 6) Return and tap the LinkedIn icon
- 7) Observe whether any browser or app opens

Description:

The social media icon links placed in the app footer (Facebook, Twitter, LinkedIn) are non-functional. Tapping any of them does not open an external browser page or the corresponding social media application. No action occurs.

Screenshot / Attachments:

Expected Result: Each social media icon should open the corresponding social media page in the device's default browser or the respective app.

Actual Result: Nothing happens when any of the social media icons are tapped. No browser or app opens.

Severity: Medium

Priority: Low

#10

Title: Postal Code field accepts letters and invalid characters without validation

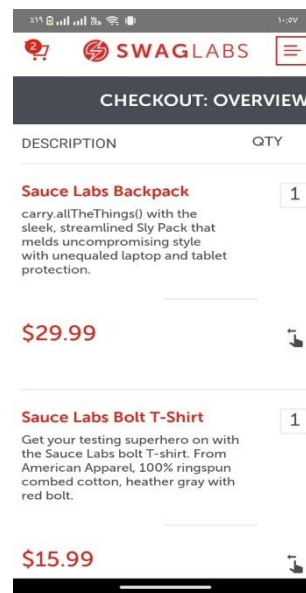

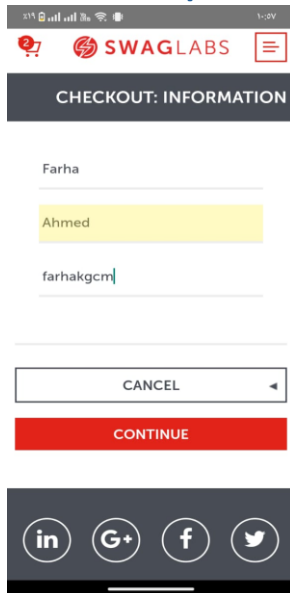

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with any valid credentials
- 3) Add a product to the cart and proceed to Checkout
- 4) On the 'Your Information' screen enter First Name and Last Name
- 5) In the Postal Code field type alphabetic characters such as 'ABCDE'
- 6) Tap 'Continue' to proceed
- 7) Observe whether any validation error is shown

Description:

The Postal Code field on the Checkout information screen does not validate the entered input. Any text including letters, special characters, and random strings is accepted and the checkout flow continues normally without displaying any error message.

Screenshot / Attachments:

Expected Result: The Postal Code field should validate input and display an error message if non-numeric or invalid characters are entered. The user should not be able to proceed with an invalid postal code.

Actual Result: The checkout continues without any validation error even when letters or special characters are entered in the Postal Code field.

Severity: High

Priority: High

#11

Title: Cart badge shows incorrect item count when adding products with problem_user

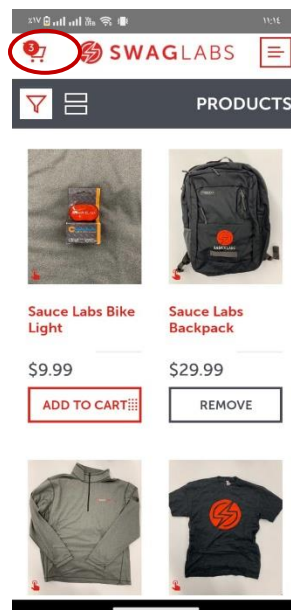

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with problem_user / secret_sauce
- 3) Add products to the cart one by one
- 4) After each addition observe the cart badge number at the top right
- 5) Compare the badge number with the actual number of taps performed

Description:

When logged in with problem_user, the cart badge counter does not accurately reflect the number of items in the cart. Because some 'Add to Cart' taps are silently ignored, the badge shows a lower count than expected. There is a clear mismatch between user action and the displayed state.

Screenshot / Attachments:

Expected Result: The cart badge should always show the exact number of items currently in the cart and update in real time after every add or remove action.

Actual Result: The badge shows a lower count than expected. Some add actions are not reflected in the badge, causing confusion about the actual cart contents.

Severity: High

Priority: High

#12

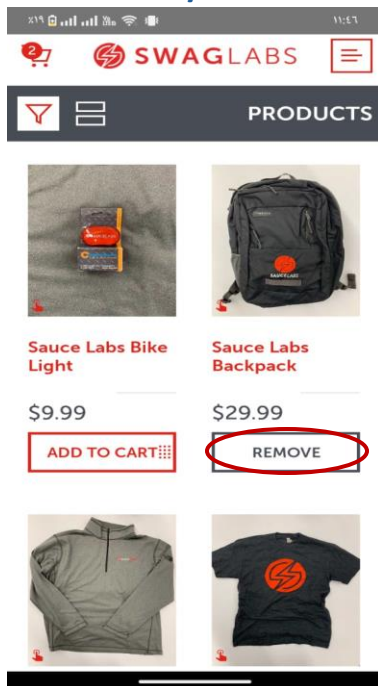

Title: Items cannot be removed from the cart on the Products screen

Steps:

- 1) Open the Swag Labs mobile app
- 2) Login with problem_user / secret_sauce
- 3) Add one or more products to the cart (notice the button changes to 'Remove')
- 4) Tap the 'Remove' button for any added product
- 5) Observe the button state and the cart badge at the top right

Description: When logged in as problem_user, the 'Remove' button on the inventory page is non-functional. Clicking the button does not revert it back to 'Add to cart', and the item remains in the cart with the badge count unchanged. There is no error message or feedback provided to the user.

Screenshot / Attachments:

Expected Result: Tapping the 'Remove' button should remove the item from the cart, change the button back to 'Add to cart', and decrease the cart badge count.

Actual Result: The 'Remove' button remains active, and the item is not removed from the cart.

Severity: Medium

Priority: Medium
