1. Test Cases Overview

This section provides a detailed breakdown of all test cases executed during the project.

Test Cases Overview

Test Category	Number of Test Cases
Total Test Cases	30
functional Test Cases	20
UI Test Cases	10

Component test cases focus on individual system components like add-to-cart logic, payment processing, and order confirmation validation. UI test cases verify the user interface including form fields, progress indicators, and mobile responsiveness. Integration test cases ensure seamless communication between the checkout system and third-party services such as payment gateways .

2. Test Cases by Priority

Test cases were categorized by priority based on their business impact on the checkout workflow. High priority cases cover core functionality that directly affects order placement and revenue, including payment processing, order confirmation, and cart management. Medium priority cases support user experience features such as address validation and error handling. Low priority cases involve non-critical elements like guest user features and UI polish.

Test Cases by Priority

Priority Level	Number of Test Cases
High Priority	12
Medium Priority	15
Low Priority	3

3. Test Execution Status

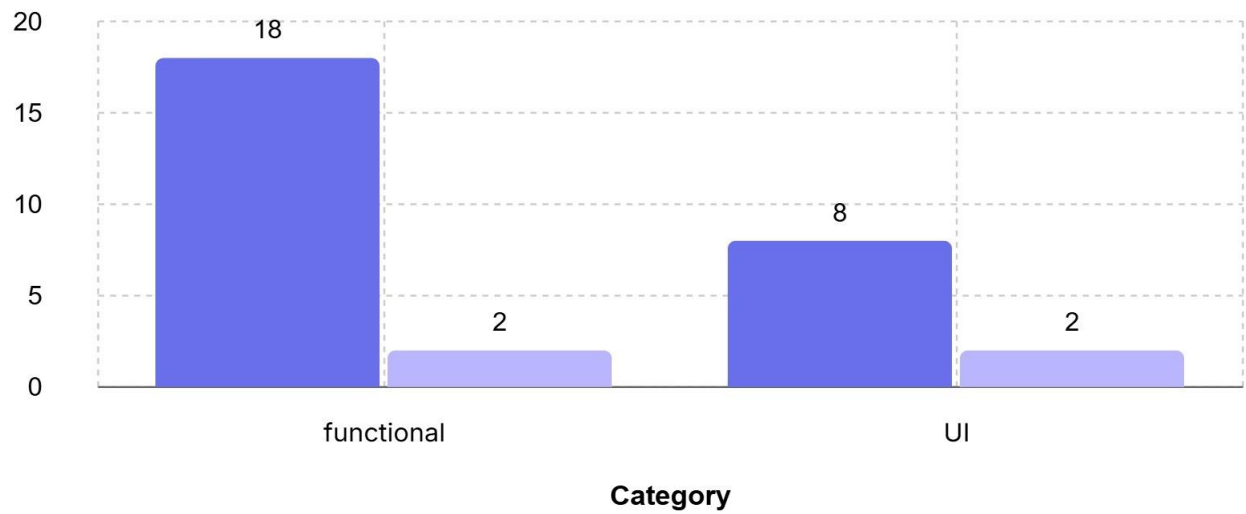

Test Execution Status

Category	Passed	Failed
Overall	26	4
functional Tests	18	2
UI Tests	8	2

Test Execution Status by Category

Test Cases Count

4. Defects (Bugs) Summary

Defects Summary

Category	Number of Bugs
Total Bugs Identified	21
Functional Defects	15
UI Defects	6

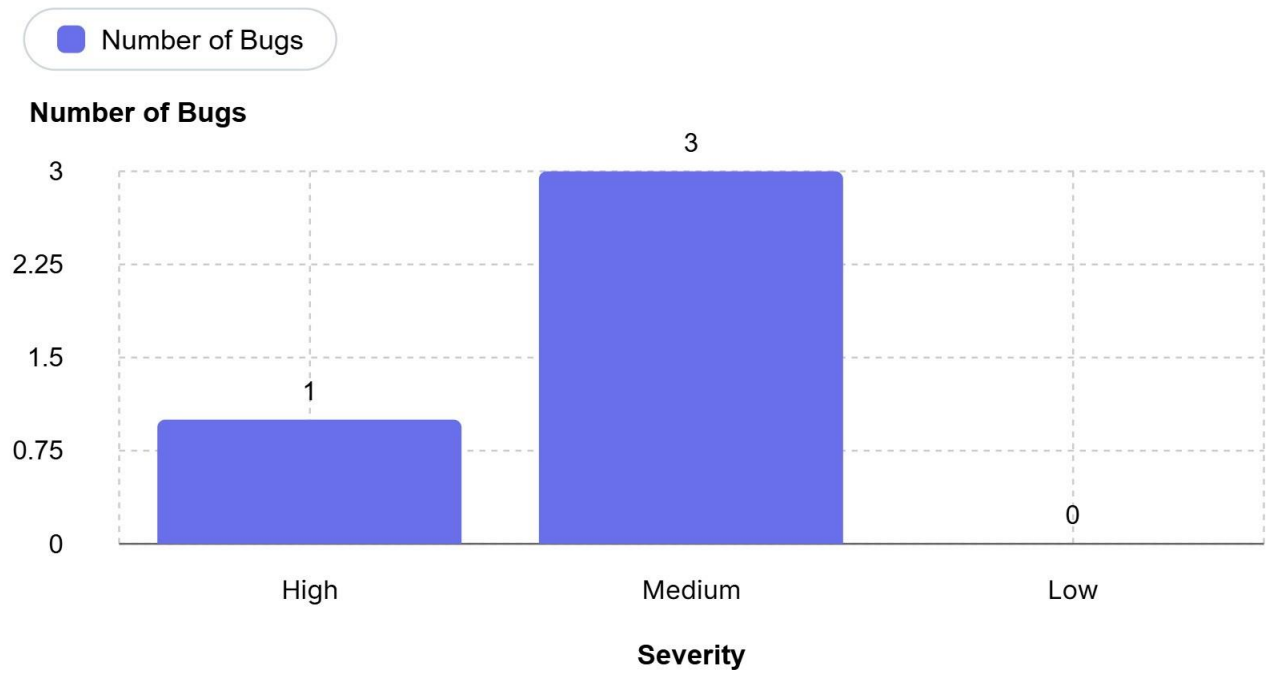

5. Bugs by Severity

Defects were classified by severity to prioritize fixes based on their impact on system functionality. High severity bugs block key checkout steps or compromise transaction integrity. Medium severity bugs affect user experience but do not prevent checkout completion. Low severity bugs involve cosmetic issues with minimal functional impact.

Bugs by Severity

Severity Level	Number of Bugs
High Severity	1
Medium Severity	3
Low Severity	0

Bugs by Severity Classification

6. Bugs by Priority

Bugs by Priority

Priority Level	Number of Bugs
High Priority	1
Medium Priority	3
Low Priority	0
